

HISTORY AND GENEALOGY OF FENWICKS COLONY

We flew over and spent most of the day glubbing around in the Pacific with a bunch of kids fifteen years younger than I and five years younger than Janice. I'd been on these jaunts with Janice before and enjoyed them so much I'd bought my own wetsuit But I didn't enjoy it nearly as much as I did Saturday night and all of Sunday..next four years. He spent most of August, when he should have been on vacation, trying various methods of detecting sound through the device. By focusing on the interior of a speaker's larynx and using infrared, he was able to convert the visible vibrations of the vocal cords into sound of fair quality, but that did not satisfy him. He worked for a while on vibrations picked up from panes of glass in windows and on framed pictures, and he experimented briefly with the diaphragms in speaker systems, intercoms and telephones.
