He did not understand why the ceiling.Across the hurrying flow of people, above their heads, I noticed a window in the distance.. "More a mater of getting in with it, I think." The old man was burying the core of his apple and the larger bits of eggshell under loose dirt, patting it over them neatly. "Of course I know the words, but I'll have to learn what to do as I go. That's the trouble with the big spells, isn't it? You learn what you're doing while you do it. No chance to practice. "Ah-there! He was not harsh, but he was unyielding. Diamond had no idea what opinion Hemlock had of him, and guessed it to be pretty low. The wizard sometimes had him come with him to his work, mostly laying spells of safety on ships and houses, purifying wells, and sitting on the councils of the city, seldom speaking but always listening. Another wizard, not Roke-trained but with the healer's gift, looked after the sick and dying of South Port. Hemlock was glad to let him do so. His own pleasure was in studying and, as far as Diamond could see, doing no magic at all. "Keep the Equilibrium, it's all in that," Hemlock said, and, "Knowledge, order, and control." Those words he said so often that they made a tune in Diamond's head and sang themselves over and over: knowledge, or-der, and contro-----.....There was a pause, and Diamond said, "So you saw to it...that I..." By the time the peaches flowered, he had made a slender, sturdy deep-sea boat, built according to the style of Havnor. He called her Hopeful. There were no men of power, few men at all, on the island..Sorcery was practiced by men-its only real distinction from witchery. Sorcerers trained one another, and had some knowledge of the True Speech. Sorcery included both base crafts as defined by Halkel (finding, mending, dowsing, animal healing, etc.) and some high arts (human healing, chanting, weatherworking). A student who showed a gift for sorcery and was sent to Roke for training would first study the high arts of sorcery, and if successful in them might pursue his training in the art magic, especially in naming, summoning, and patterning, and so become a wizard..my side and was smiling as before. All animals were patient, but the patience of the horse kind was wonderful, being freely given. Dogs were loyal, but there was more of obedience in it. Dogs were hierarchs, dividing the world into lords and commoners. Horses were all lords. They agreed to collude. He remembered walking among the great, plumed feet of cart horses, fearless. The comfort of their breath on his head. A long time ago. He went to the pretty hinny and talked to her, calling her his dear, comforting her so that she would not be lonely.. "I've been coming doing business here some ten years," he said, looking Irioth up and down. "A man." "Your majesty is sending forth his fleets," Early said to the staring old man in the armchair in the palace of the kings. "A great enemy has gathered against you, south in the Inmost Sea, and we are going to destroy them. A hundred ships will sail from the Great Port, from Omer and South Port and your fiefdom on Hosk, the greatest navy the world has seen! I shall lead them. And the glory will be yours," he said, with an open laugh, so that Losen stared at him in a kind of horror, finally beginning to understand who was the master, who the slave. court to Havnor and made Havnor Great Port the capital of the kingdom. More central than Enlad. Irioth came up onto the doorstep. He did not go in, but spoke in the open door. "Master San, it's about the cattle you have there between the rivers. I can go to them today." He did not know why he said this. It was not what he had meant to say. "Do you think that's true?" he asked. He drew back, staring, and made a fierce motion of his hand that brushed away the stream in a spray like a fountain blown by the wind. The gash in the earth grew deeper, revealing the ledge of mica. With a sharp rending crack the glittering stone split apart. Under it was darkness. But beyond the rich and the lordly were those called the Men of Power: the wizards. Their power, there was nothing but shame and pain and anger in it for Golden. So he had his tragedy. Berry went and fetched his sister, after he had heard Sunbright's tale at the tavern, and San's version of it, and several other versions already current. In the best of them, Otak had towered up ten feet tall and struck Sunbright into a lump of coal with lightning, before foaming at the mouth, turning blue, and collapsing in a heap. chased and fought one another across the Straits and the wizard-troubled sea. That made sense to her. On Way, "a wizard without his porridge" meant something unprecedented, unheard-of. But she was no wizard, and so, thinking to earn her porridge, she did her best to repair the Otter's House, borrowing tools from a farmer and buying nails and plaster in Thwil Town, for she still had half the cheese money..Ivory went, limping only very slightly, to an old mounting-block nearby and sat down on it.
