society whose natures would keep them hanging on to the end regardless. Above all there remained Borftein, who had nowhere else? to attach a loyalty that his life had made compulsive. Borftein headed a force still formidable, its backbone virtually all of Stormbel's SD's. Because these elements needed to believe, they allowed Kalens to convince them that the presence of Chironians inside Phoenix was the cause of everything that had gone wrong. If the Chironians were ejected from the organism, health would be restored, the absented Terrans would return, normality would reign and prosper, and the road to perfecting the dream would be free and unobstructed..because it meant "dull, insipid, juvenile, immature"?and yet it sounded as though it ought to mean.cliff, so be it; even in his dying fall, he will love her, his sister-becoming..York, New York 10036..EPILOGUE.Corporal Swyley wasn't saying anything, which was significant because Swyley was usually a pretty good judge of what was what. He never said he agreed with anything. The M.O. had diagnosed that anybody with stomach cramps on his own time had to be sick. Swyley hadn't. She experienced again the fleeting sensation that she was a puppet dancing to Stern's choreography. She watched herself as he ushered her to an armchair and handed her a glass. Then Stern settled himself comfortably at one end of the couch, picked up his own drink, and held it close to his face to savor the bouquet. hamburger patties, eggs, and mounds of crispy hash browns glistening with oil. Bernard's concern changed to a deep, uneasy, suspicion as he listened. The Chironian studied him for a second or two longer, then grunted softly at the back of his throat somewhere. "We didn't do that," he said. Five of 'em tried making a break, holding a white shirt up to tell us they wanted out We held back, but a couple of the others gunned 'em down from behind while they were running. She was one of those five." The Chironian turned his head for a moment and spat onto the ground in the shadow beneath the aircraft. "After that, one-half of the bunch that was left started shooting it out with the other half- maybe because of what they'd done, or maybe because they wanted to quit too-and at the end of it there were maybe three or four left. We hadn't done a thing. Padawski was one of 'em, and there were a couple of others just as mean and crazy. Didn't leave us with too much of a problem." "A good question," Wellington commented. "Not really." came at hand; half measures were fatal. The shorter-term price to be paid was regrettable, but when had Nature ever offered free lunches? And in the longer term, what did it mean anyway? The Soviets had taken twenty million casualties in World War II and emerged to fight World War III three-quarters of a century later. And in that conflict the U.S. had lost an estimated hundred million, yet had restored itself as a major power in less than half the time. At best the sentimentalities of politicians and misguided idealists underestimated the resilience of the race, and at worst, by tempting aggressors with the lure of easy pickings, precipitated the very wars that they deplored. Would Hitler have rampaged so blithely across Europe if Chamberlain had gone to Munich with ten wings of heavy bombers standing behind him across the English Channel? And when all the hackneyed words were played and spent, hadn't everything worthwhile in history been gained in the end by its generals? Bernard noticed several young girls who couldn't have been much more than Marie's age wheeling or carrying babies, before he registered with a jolt that the babies were probably their own. Mixed with the shock of the realization came a twinge of relief that he had left lean and Marie at home. Explaining this was going to require some delicate handling. "Howard Kalens," he said in a lower voice. "Couldn't that have been a final warning? Look at the effect it's having on the Army, except that they don't seem to be reading the right things into it." As Chaurez finished speaking, an indicator announced an incoming call from the Government Center. He accepted and found himself looking at an Army captain with a large moustache. "Forward Security Command Post," Chaurez acknowledged. "Better go, thingy, better squiggle," Sinsemilla advised gleefully. "Here come bad-ass Lani, and dis here." "Yes, I can, and no, there aren't. Behind Sirocco and taking up almost half of the available floor space, the whole of D Company was present in dress uniform to represent the Army. Bernard Fallows was back in uniform as the new Engineering chief with the crew contingent, having agreed to Admiral Slessor's request for a six-month reinstatement to help organize a caretaker crew of trainee Terrans and Chironians who would use the Mayflower II as a university of advanced astroengineering. Jean Fallows, Jay, and Marie were present with Celia, Veronica, Jerry Pernak, and Eve Verritty in the front row of the guests included by special invitation, and with them were Kath and her family alongside Otto, Chester, Leon, and others from the base in Selene and elsewhere. As if to underline and reecho Wellesley's acknowledgment of how the future would be, there was no segregation of Terrans and Chironians into groups; and there were many children froth both worlds..in their own home, even if their home is on wheels..The fallen fence pales clicked and rattled under Micky's feet as she entered the adjoining property.. "Who's Colman?" Lechat inquired..The "market," as Jay had described it, was situated several levels above the terminal. To get to it they used a series of escalators. A lot of people were milling about, as natural a part of the night as the musky smell of animals and the not altogether unpleasant scent of managed to remain upright, lurching all the way to the door, where she clutched at the knob for support..dealership to which it should be delivered. "Would they accept a job like that?" Jean asked, sounding dubious..Micky shook her head. "They wouldn't leave you in the care of your mother's boyfriend." "A lot of people are starting to think he could have bad those bombs planted. What do you think?". Lechat picked up his fork again. "I never looked at it in quite that way. It's an interesting thought." He began eating again, then stopped and looked up. "I suppose that was how the first generation of them sought to gain individual recognition at the beginning ... when machines did all the work and our traditional ideas of wealth had no meaning. And it's become embedded in their basic thinking." He nodded slowly to himself and reflected further. "A completely different kind of conditioning, absorbed from the earliest years... based on recognizing individual attributes. They've never had any reason to feel threatened by other groups.".The chest of drawers stood against the wall, on four stubby legs. More than live feet high. Four feet.front of the motel.. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. At the end of that period New America extended from Alaska to Panama, Greater Europe had incorporated Russia, Estonia, Latvia, and the Ukraine as separate nations, and China had come to dominate an Eastern Asiatic Federation stretching from Pakistan to the Bering Strait. All three of the major powers had commenced programs to reexpand into space at more or less the same time, and since each claimed a legitimate interest in the colony on Chiron and mistrusted the other two, each embarked on the construction of a starship with the aim of getting there first to protect its own against interference from the others..attraction for light, and the vodka glimmered like quicksilver..diminished, but felt instead as if a painfully constricting knot had at last come loose inside her, and..Juanita saw the expressions on Bernard's and lay's faces.
