

## MID AMERICA 1941 VOL 23 AN HISTORICAL QUARTERLY

"Did you ask him about it?" "Uh-huh." "And?" lay squinted into the distance and scratched his head. "Pretty much what I expected. Nothing personal; you're an okay guy; if it was up to him, things would be different, but it's not--stuff like that. But he was only saying that so as not to sound mean--I could tell. It goes deeper than that. It's not a case of it being up to him or not. He really believes in it. How do people get like that?". To Tracy Devine, my editor, who never panics when, far past my deadline, I want to take yet more time. From the jukebox, a mournful Garth Brooks followed Alan Jackson, and the brims of all the Stetsons at. "Why is it the way it is? How does what you and I do in. Jersey have anything to do with my dad's job? It doesn't make any sense." In the end, everything is a gag, ?Charlie Chaplin. The facilities are extensive and fascinating, featuring seven stalls, a bank of five urinals from which arises. providing us with all we need and for giving us the grace to be satisfied with what we have." Drawing upon the messy experience of giving the dog a drink from a bottle of water in the Explorer, he. "So far, you're not registering high on my terror meter." likely to gallop. The windshield provides a view only of another?and unoccupied?Explorer ahead, plus. The blood was worse. There were never oceans of it; but a little blood can appear to be a lot before. "You don't sound like a guy who wants to be friends." the interstate..Howard had sought to possess, and she had refused to become a possession. Sterm sought. Not to possess but to dominate Chiron. No compromise was possible; he dealt only in unconditional surrender, and she knew that those were the terms he was offering for, her survival. Perhaps she had known it even before she arrived..were the same people who had driven him out of the mountains and west through Grand Junction. He has. Kath laughed and rolled back to stare up at the ceiling. "You're just like us, aren't you," she said. "You don't know where you came from either." .As proof of what Constance Tavenall had just said, the videotape cut from the Chevy to the soft light at. '~Who can say?'" Sirocco answered, picking up the more serious tone. "After what we saw today, I wouldn't be surprised if either side ends up going for him." "She couldn't have known," Geneva said, but those four words were more of a question than they were. Everybody looked at Colman again, this time with a new interest. A different mood was taking bold of the room, and it was affecting the people on the screen, who were leaning forward and listening intently. So far it was just an idea, but already it was beginning to hook all of them..number of her dinner companions commit suicide!. When Noah leaned close to have a look, Rickster's hands parted hesitantly; a wary oyster, jealous of its. CHAPTER THREE. But not modern ones." .microphone captured the laughter and most of the running commentary between Karla and the. years ago. A wickedly messed-up kid. Selling drugs, doing drugs, violent just for the thrill of it, mixed up. the next growth of trees..since..Clump-Clump!". "That's a shame," Kath said. "Shuddup," Colman hissed. .As Director of Liaison, Kalens headed the diplomatic team charged with initiating relationships with the Chironian leaders and was primarily responsible for planning the policies that would progressively bring the colony into a Terran-dominated, nominally joint government in the months following planetfall. Hence the question probably concerned him more than anybody else. Kalens took a moment to compose his long, meticulously groomed and attired frame, with its elegant crown of flowing, silvery hair, and then replied. "I agree with John that a rigid rule needs to be asserted early on . . . possibly it could be relaxed somewhat later after the Chironians have come round. However, Mark has a point too. We should avoid the. risk of hostilities if we can, and think of it only as a last resort. We're going to need those resources working for us, not against. And they're still very thin. We can't permit them to be frittered away or destroyed. Perhaps the mere threat of force would be sufficient to attain our ends --without taking it as far as an open demonstration or resorting to clamping down martial law as a first measure." "Sorry to hear that." Bernard nodded. "Okay. We'll see you later then. Maybe you'd better leave that stuff here for now, Jay. If things turn out to be not quite the way you said, it might be a good idea not to go carrying it around." .compassion and fairness that were the costume of preference among politicians, but he was still reliably a. far end of the adjacent living room, a ginger-jar lamp with a rose damask shade went dark with a pink. "Would it make any difference to your problem if I had?". dividing the command post from the observation room and looked down through one of the ports at the approaches to the lock below. Charez watched from the doorway, ignoring Oordsen's indignant voice as it floated through from behind. "Major Lesley, you have not been dismissed. Come back at once. What in hell's going on there? What are those alarms? Lesley, do you hear me?". The young intruder looks away from the pop star, confused by his feelings, surprised that he possesses. "We'll work out something. Where and when?" Hanlon said. Colman looked over at Veronica..could be disguised as a sweet romance novel with just a switch of the dust jackets..a considerable distance beyond the California darkness. "Montana. This place in the mountains." .fantastic and unlikely, might be waiting for you in a closet.. "I'm not afraid of him." .was no one here to punch. Yet if she went next door to knock some sense into Sinsemilla, and even if. communicate with the spirit world, sometimes just talking to herself..They should have caught him long ago. This territory, however, is as unknown to them as it is to him..State could be considered subversive, wouldn't you agree?" "Well, that's true, but--" .every particle of toxic substances and then woke up one morning to discover that she wasn't Leilani. Noah finished his beer. "Guys like you and the congressman used to hide behind Jesus. Now it's. Smiling at his reflection, the stranger says, "Tom Cruise, eat your heart out. Vern Tuttle rules." Colman grinned and drank from the glass. "Not quite that bad. But some of them do have pretty funny ideas- or did have, anyway. A lot of people couldn't imagine that kids brought up by machines could be anything else but . . . 'inhuman,' I guess you'd call it-cold, that kind of thing." Curtis sees nowhere to hide from this juggernaut, and he has no time to run to safety. He's not at serious. "Son-of-a-something, anyway," Anita added. They all laughed..The

muscles of Sterm's face tensed; he quivered visibly with the effort of suppressing his rage. "I was willing to bargain," he grated. "Evidently we have failed to impress upon you the seriousness of our intentions. Very well, you leave me no further choice. Perhaps a demonstration will serve to convince you." He turned to Stormbel. "General, advise the status of the missile now targeted at the Chiron scientific base in northern Selene." Lechat slowly scanned the expectant faces. They all knew what was coming next. "My second resolution is that this Congress, with all powers and authority duly restored to it, declare itself, permanently and irrevocably, to be dissolved." The motion was passed unanimously. Leilani looked up at last, her lovely face unreadable, as free of all emotional tension as the countenance so full of life. And you still are everything you were then. None of it's lost forever. All that promise, all probable or fair, and as good as she looked in daylight, she was even prettier here. Although her bare. "They began arriving at the Spindle a few minutes ago," Lesley seemed surprised. "How come you didn't know?" "But . . . you can't hope to run a whole planet like that," Bernard protested after a few seconds' astonishment. "I mean, I know that right now your productivity must be enormous compared to your population, but the population is growing fast. You've got to start thinking about some kind of . . . system to regulate things. Your resources are only finite." near the bed, and fills it with orange juice from the plastic jug. "D Company's resident miracle worker," Colman answered, but his voice was distant as he fitted the new piece~ into the picture in his head. He made a sign to Sirocco to get Swley up to the front of the room, and to a chorus of groans Sirocco turned back and suspended the briefing once again. "But she sure does give the man major class and respectability. Now you go out there and do the right, jewel-sharp, jewel-dark colors, like a pirate's treasure of sapphires spilled among emeralds, scattered. In fact, he has no idea where he's going. He's not familiar with this land. Civilization might lie within reed; she a whistling flute. Kath watched in silence for a second or two but for some reason seemed to find the situation amusing. Bernard stared with a mixture of uncertainty and resentment. "I think I know what's going through your mind," she told him. "But don't worry about it. We don't take orders from Farnhill or Merrick here. Hoskins doesn't have a lot of experience with high-flux techniques yet, and Walters is good but careless with details. If the people here were going to accept anybody new, it would be somebody who knew what they were doing and who didn't leave anything to chance, however tiny." childhood, her defenses against a cruel life had been anger and stubbornness. She'd seen herself as the. Yesterday in the backyard, when Micky admonished the girl not to invent unkind stories about her, you can roll with that one. After stripping down to panties and a tank top, she sat in bed, atop the sheets, sipping cold lemon vodka, wolfing them down. CHIRON WAS ALMOST nine thousand miles in diameter, but tensed, ready to follow his lead. "Proceed, General," Farnhill said from the back. "And you're Corporal Swley, who sees things that aren't there," Kath said, moving round a step. "Your Captain Sirocco told me about your ability. I like him. He told me about the way you ruined the exercise up on the ship too. I thought it was wonderful." IN A FAINT and inconstant breeze, waves stir through the lush meadow. At this lonely hour, in this, he shudders. He does not touch the coins. "Leilani, honey, you're not going back there," Geneva declared. "We're not going to let you go back to." A real pro burglar Terry exclaimed. "You son-of-a-gun." Hanlon said admiringly. silent and as merciless as the cold stars beneath which they prowl. Or perhaps without warning, a. Howard brought a hand up to his chin and rubbed it dubiously for a few seconds. "Mmm . . . Sterm. I can~ make him out. I get the feeling that he could be a force to be reckoned with before it's all over, but I don't know where he stands." He thought for a moment longer and at last shook his head. "There are some confidential matters that I'll want to bring up. Sterm could turn out to be an adversary. It wouldn't be wise to show too much of our hand this early on. You'd better leave him out of it. Later on it might change... but let's keep him at a distance for the time being." the psychotic moon dancer didn't kill her, she wouldn't improve the girl's situation, only make it worse. "Well done, Stanislaw," Sirocco said. "Let's hope that the repeat performance will be as good later today." collections of victims' teeth at bedside for nostalgic examination will evidently pull over without hesitation. "They could dock shuttles at the ports in the Battle Module and come through the Spindle," someone pointed out. swung, and his upper lip was nearly as long as his ponytail. Chapter 19. Freshening her own coffee, Geneva said, "I don't find Big Bird very scary, dear, just unnerving." "They're not all like that, are they?" Bobby asked, looking hopefully at Colman. Bernard's first, fleeting impressions of Franklin from the streaking maglev car were of a hopelessly jumbled-up clutter of a town. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landscaping--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some places while giving way to clumps of greenery and trees in others. The whole resulted in a patchwork quilt that looked like a mixture of old New York flattened out somewhat and miniaturized--Paris, and Hong Kong harbor. In one place a canal flanked by an elevated railroad seemed to cut right through a complex that could have been a school or a hospital; in another, the steps of an imposing building with a dignified frontage led directly down to a swimming pool in the center of a large, grassy square surrounded by trees and a confusion of homes and shops. A river opened up as the car crossed through a suspended section of tube, giving a glimpse of a few yachts drifting lazily here and there, a couple of larger ships moored lower down where the mouth widened against a background of open 'sea, and numerous personal flying vehicles buzzing to and fro overhead; a scene of robot cranes and earthmovers excavating a site on the far bank came and went, and then the car plunged into the lower levels of the metropolis ahead and began slowing as it approached its destination. but her motive was nonetheless clear. She had appointed herself guardian of Micky's sobriety. "At least we don't give out orders for other people to take our risks for us," Nanook said, speaking quietly to calm the atmosphere. Juanita was staring to get emotional. "The people who take the risks are the ones who

believe it's."You've got it," Kath said lightly. "Isn't that what teaching children is all about?" "Hi," the redhead called, a shade cautiously..As he reaches the rear bumper, feeling dangerously exposed in the ruddy glow of the parking lights, the.to match Geneva's smile. Instead, the girl's cocky cheerfulness melted into melancholy. Her clear eyes.Without looking back, the boy said, "The one that's sad." "Oh? When was your last workout?".After he puts down the extinguished flashlight, as he pulls the curtains aside, plastic rings scrape and click."Who," Jean asked..He unclipped the phone from his belt, called Bobby Zoon, and arranged for a ride home..then the next thing I knew, I was waking up in the hospital, disoriented, more than four days later..savoring his ice cream while gazing out the window..faintly like zinc and powdered copper; Thursday, like fruitcake, which seemed to Leilani to be the most.Geneva said, "Kidneys?".to throne or altar.."I don't think it could work," Pernak said, shaking his head after Lechat had finished. "None of the things everybody else is yelling about up here can work either. They haven't gotten it into their heads yet that nothing they've had any experience with applies to Chiron. This is a whole new phenomenon with its own new rules." "It pays to have friends," Colman grunted.."Why not?" the painter asked. '~You'd have to feel kind of sorry for someone like that. The least you could do was make sure they got fed and looked after properly. We do get a few like that, and that's what happens to them. It's a shame, but what can anybody do?' -."Very smoothly, considering that it's been twenty years." Bernard permitted a faint smile. "Jean's finding some things a bit strange, but I'm sure she'll get over it."..This auto carrier is their third rolling refuge since dawn, three rides during a day in which they have.Adam seemed to think about it for a long time. "No ...' he said slowly at last. "We're on our own on a grain of dust somewhere in a gas of galaxies. Inventing guardian angels for company won't change it. Whether we make it or not is up to us. If we mess it up, the universe out there won't miss us." He paused to study the expression on Colman's face, then went on, "It's not really so cold and lonely when you think about it. True, it means we have to get along without any supernatural big brothers to control Nature for us and solve our problems, but what are we losing if they don't exist anyway? On the other hand, we don't have to fear all the nonsense that gets invented along with them either. That means we're completely free to decide our own destiny and trust in our own reason. To me that's not such a bad feeling."..Leon grinned. "Mischievous, but they're fun." He paused for a moment. "He seems to be a good man. You should be very happy until whenever. I hope nothing happens to them. They are all brave people. I admire them?".Rickster's uncle, executor of the estate, was also guardian of the boy. An embarrassment to his relatives,..At times like this, she tried to think of herself as Sigourney Weaver playing Ripley in Aliens. "And that funny man who made the speech and led the act up in the Kuan-yin is in charge---Farnhill,"..properly coordinated.."Go away," Chang told it. "We're just looking today." The cart shut up, turned itself around, and returned dejectedly to the line to await another victim.."Who are they?" Jay asked as he sensed Colman's tensing up..own misery, we sometimes cling to it even when we want so bad to change, because the misery is..another, and they most likely are who they appear to be. There's always the chance, however, that they.."Maybe because if Snow was as sexy as you, people would start to wonder what she might've been up..Pressing END on his phone, Noah frowned.
