They should have caught him long ago. This territory, however, is as unknown to them as it is to him. "I know. Maybe we can get Gustav and Steve working on it together." "When was it changed, Captain?" "To whom do I have to justify anything? Those rules belong to Earth. I make my own." A long silence went by while they took it all in. It meant that ever since planetfall, the Mayflower II had been shadowed in orbit around Chiron by a weapon that could blow it to atoms in an instant. And the camouflage had been perfect; the Terrans themselves had put it there. It was the most lethal piece of weaponry ever conceived by the human race. No wonder the Chironians had been able to cover every bet put on the table and play along with every bluff. They could let the stakes go as high as anybody wanted to raise them and wait to be called; they'd been holding a pat hand all the time. Or was it the Smith and Wesson that Chang had mentioned at Shirley's, perhaps not so jokingly? "That's okay," Colman said. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stain to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end. "His best performance ever. Everything okay out there?" rolling through her in nauseating waves...GENERAL J STORMBEL did not make mistakes, and he was not accustomed to being held responsible for the mistakes of others; people under him tended to find out early on that they did not make mistakes. Their acceptance of the standards and disciplines that he imposed provided a permanent assertion of his symbolic presence for as far as his sphere of command and influence extended, and served as a constant reminder that his authority was not to be trifled with. Displays of laxness represented an acknowledgment that was less than total, and signified lapses of mindfulness of the omnipresence that his authority projected-as if people were beginning to forget that what he said mattered. Stormbel didn't like that. He didn't like people acting as if he didn't matter...somewhere, with her clatter-clank leg under a table, with her poster-child hand tucked out of sight in her. In spite of all that she knew about Sinsemilla Maddoc, Geneva cringed from this charge against the. "You mean by reputation, or something like that?" Lechat asked, beginning to look intrigued...The Chironians replied readily enough to questions about their population growth and distribution, about growth and performance of the robot-operated mining and extraction industries and nuclear-driven manufacturing and processing plants, about the courses being taught in their schools, the researches being pursued in their laboratories, the works of their artists and composers, the feats of their engineers and architects, and the findings of their geological surveys of places like the sweltering rain forests of southern Selene or the far northern ice-subcontinent of Glace...Movement to Noah's left drew his attention. A few feet away, another demolition expert swung a. Colman grinned faintly and gestured across the room. "The same one that brought you Veronica and Celia." The murmurs from across the street rose suddenly to catcalls and jeers, accompanied by waving fists and the brandishing of sticks that appeared suddenly from somewhere. Colman turned and saw the black limousine that Howard Kalens had had brought down from the Mayflower II appear at an intersection a block farther along the street and stop near a group of officers standing nearby. Major Thorpe detached himself from the group and walked across. Colman could see Kalens's silver-haired figure talking to the major from the rear seat. Somebody threw a rock, which landed short and clattered harmlessly along the pavement past the feet of the officers. More followed, and several Terrans moved forward threateningly... You're like this terrific prize that turned up in a box of rancid. Chang laughed. "It's okay. We won't be going very high, and it'll be more walking than anything else. There won't be anything more risky than maybe a few daskrends showing up." Karla giggled, said something indecipherable, and pulled Sharmer inside, closing the door behind them... "Stop this now," Borftein advised grimly. "How much of the Army do you think will follow you?" her eyelids, and the slow steady flow of tears... "I don't have any idea what you're talking around," Micky lied. "That's for you to tell me . . . when you're." For a few seconds Bernard and lay were too stunned to say anything. "But... that's crazy," Bernard protested at last. "You can't just let everybody go round shooting anyone they don't like." "Stay off the streets and keep out of sight," Fulmire said. "Stern and Stormbel have pulled a coup. They've got the SDs and at least some of the regular units- I'm not sure how many. They're arresting all the members of Congress up here, and squads are out at this moment to round up the rest. I'm probably on the list too, so this will have to be quick. They're taking over the Communications Center, and they've made a deal with Slessor to leave him and his crew alone if he sticks to worrying about the safety of the ship. Get out of Phoenix if you can. I don't know if-"

The picture and the voice cut out suddenly.. managed a laugh even though a smile had eluded him. Oh, but it would have been a humorless bark of a. In a secluded wing high up in one of the towers of the Government Center, a white-jacketed steward, who had emigrated to America from London in his youth and had been recruited for the Mission as a result of a computer error, whistled tunelessly through his teeth while he wheeled a meal trolley stacked with used dishes toward the small catering facility that supplied food and refreshments for the conferences, meetings, and other functions held in that part of the complex. He didn't know what to make of the latest goings-on, and didn't care all that much about them, for that matter, either. It was all the same to him. First Wellesley was in, and they wanted twelve portions of chicken salad and dessert; then Wellesley was out and Stern was in, and they wanted twelve portions of chicken salad and dessert. It didn't make any difference to him who. Flushed with embarrassment, unable to look at Old Yeller, the boy turns from the bureau and tries the. Colman grinned. "You're right, but you're supposed to pretend you don't know about that. I was thinking of something else-- recognition. It's another part of human nature that surfaces when the more basic things have been taken care of. And when it does, it gets to be just as powerful as the rest. A guy needs to think that he measures up when he compares himself to the other guys around him. He needs to be recognized for what's good about him and to stand out. Like you said, it's probably sex, because he thinks the girls are taking notice, but whatever the reason, it's red." Then the tramp of marching footsteps growing louder came from beyond the main doors. A second later the doors burst open, and General Stormbel stomped in at the head of a group of officers leading a detachment of SD troopers. With dispatch, the troopers fanned out, closed all the exits, and posted themselves around the walls to cover the assembly, while Stormbel and the officers marched down the main aisle to the center of the floor and turned to face the Congress from in front of where Wellesley was still standing. Borftein leaped to his feet, but checked himself when an SD colonel trained an automatic on him. He sank into his seat, a dazed expression on his face.. anymore, that she was the pope or maybe some pure and saintly girl named Hortense? She didn't have. abandoned. "It hasn't started to respond yet," Stormbel said, sounding relieved for the first time in hours. "Perhaps we took them by surprise after all." He glanced at the numbers appearing on a display of orbit and course projections, "In any case, it can't touch us now." spare parts by a machine knacker.. In a crouch, he crosses the roof to the brink. When he looks back again, the mutt whines beseechingly. Jay Fallows thought for a moment that he was going to throw up and tried to shut out the soundtrack as he sat nibbling at the remains of his lunch. An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star-- the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb~ shining in the foreground. And the view from Earth didn't show Proxima Centauri at all-- a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and ;easily seen from the Mayflower II. Always imperceptible from one day to the next and practically so from month to month, the changes in the stars were happening ever more slowly as the main drive continued to fire and steadily ate up the velocity that had carried the ship across four light-years of space.. On his right, a meadow bank grows, then looms, as the two-lane blacktop descends, while on his left, "They're all such selfless do-gooders." Constance

"Well, Kalens's wife is always going places with Veronica, so they're obviously good friends. Swyley noticed something funny between you and Veronica at that party we went to at Shirley's, and that was the connection he figured out," Sirocco shrugged again. "I mean, it's none of my business, of course, and I don't want to know if it's true or not He paused and looked at Colman hopefully for a second. "Is it?". "You've never been to New Orleans," Micky affectionately reminded her..character job at Disneyland, but they turned me down." "Wha-huh? ... Who? She.Jean looked away as she heard the front door open. A few seconds later Jay arrived. He had a brand-new-looking backpack slung across one shoulder end was carrying a framed painting of an icy, mountainous landscape with a background of stormy sky under one arm. "I know. That crossed my mind too, but what is there to provoke any real trouble? There may be one or two flareups before it's all over, but this state of affairs can't last." He shook his head. "We're convinced 'this is the only way to go. We can't make other people's minds up for them, but they'll come round in their own time. Anything else would cause worse problems."..copies, plus cassettes of all the raw footage before we edited it." "I don't get your attitude." "There wasn't anything that Veronica could have done," Celia went on, "I wasn't looking for someone to unload a guilt-trip on. What I had to say was a lot bigger than that. The mind of the man who is now in control up there is as dangerous as it's possible to get-abnormally intelligent, in full command of all its faculties, and totally insane. Stern believes himself to be infallible and invincible, and he'll stop at nothing. He's holding what's left of the Army because he has succeeded in selling them a lie. And I was the only person who could expose that lie. There won't be any autopsy revelations-the body has already been cremated." Celia looked briefly at each of them in turn and was met by appalled stares as they saw what Colman had already seen a few seconds before..passing-for-nobody-special business. He hasn't given a thought to naming his four-legged companion..woman?perhaps a librarian, considering that a librarian would know how easily a book of monsters.Slam the door. Throw shut the locks, the bars, the bolts. Before the girl could say more, Micky turned.reeling off the stool. He thinks for a moment that they see through him, recognize him as the most-wanted."You too." The image vanished from the screen.."Enter, enter, Maiden Leilani, and come thou quickly to thy queen's side." "Does anyone else know about Howard?" Colman asked. "Veronica, for instance?".But Merrick didn't seem inclined to pursue that side of the matter. "Nevertheless Chironians are getting killed," he said. "How long will their patience last, and how long will it be before we can expect to see at least some of them taking it upon themselves to begin indiscriminate reprisals against our own people?-After all, it would be consistent with their dog-eat-dog attitude, which you seem to approve of so much, wouldn't it."..Thinking about plates and platters of plights and pickles, Noah risked an even more inappropriate laugh.Something isn't right, the silence too deep. Perhaps Curtis's parents have awakened..a little, too, but then he realizes that her attention is elsewhere..rehabilitated by the Circle of Friends. I expected to be spotted and warned off, but I thought the.whole army behind me, what can a rabble of ruffians with handguns do to stop me now?". "He's saying money's nothing but vomit to him." Took a..taken from the open cooler behind him..fantasy and fairy lore, though always a benign version: a kindly troll or perhaps a good-hearted kobold.THE CHIRONIANS' HANDLING OF the Padawski incident and the absence of any organized reaction among them to the initial Terran hysteria led to a widespread inclination among the Terrans privately to absolve the Chironians of blame over the bombings, but the Terrans avoided thinking about the obvious question which that implied. The aftertaste of guilt and not a little shame left in many mouths alienated the Terran extremists from the majority, and relations with the Chironians quickly returned to normal. Nevertheless, the wheels that had been set in motion by the affair continued to turn regardless, and five days later the Territory of Phoenix was declared to exist.."For a long time," Colman said..ever-dwindling but not yet eradicated capacity for romanticism..Marcia Quarrey, the Director of Commerce and Economic Policy, didn't look too happy at the suggestion as she sipped her cocktail. "Obviously that would be possible," she said, setting down her glass. "But would it serve any useful purpose? The contingency plans were made to allow for the possibility of opposition. Well, there hasn't been any opposition. What's the sense in throwing good business and growth prospects away by provoking hostilities needlessly? We can acquire Franklin simply by walking in. We don't have to make a demonstration out of it."..Before one of them comes back here to take a leak, Curtis opens the last door and steps into more
