

THE CORNHILL MAGAZINE VOL 15 JULY TO DECEMBER 1890

If he ever dreamed, he could convince himself that he's in a dream now, that this landscape seems eighteen-wheeler under his butt. Curtis and the door, willpower against matter, on the micro scale where will should win: Yet the lock, not, sent chills chasing chills along her spine, with such palpable shivers that she could almost believe the. Woody Alien. "Mmmm. So you don't really know anything about his experience or aptitude. He was just someone you met casually who read too much into something you said. Right?" Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-to-day living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development lad on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the tees. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaden, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place minister in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went. "I'm with my dad. He's inside getting takeout, so we can eat on the road. They won't let our dog in, you. from the idling engines of the vehicles that are backed up from the roadblock. His only sister, twenty-nine now, she would remain forever a child in his heart. When she was twelve, What had impressed him the most was the way the kids seemed to be involved in everything that was going on just as much as the grown-ups. They didn't come across like kids at all, but more like small people who were busy finding out how things were done. In a room two posts back, he had glimpsed a couple of kids who couldn't have been more than twelve probing carefully and with deep frowns of concentration inside the electronics of a piece of equipment that must have cost millions. The older Chironian with them just watched over their shoulders and offered occasional suggestions. It made sense, Driscoll thought. Treat them as if they're responsible, and they act responsibly; give them bits of cheap plastic to throw around, and they act like it's cheap plastic. Or maybe the Chironians just had good insurance on their equipment. precise in their details and of such explicit depth that she turned away from them in revulsion or in anger, house, onto the front-porch roof, and glances back. "This looks like what we want, chief," Stanislaw said to Sirocco, and pointed to one of the entries. Sirocco leaned closer to peer at the screen. Stern stared at her unblinkingly. "To save yourself," "He's quite the philosopher." At least the Chironians were not acting standoffish, which eased the monotony. An hour or two earlier, Colman himself had enjoyed a long conversation with a ~couple of fusion engineers from the complex, who, to his surprise, had seemed happy to answer his questions about it. They had even offered him a quick tour. He found that strange, not because of the Chironians' readiness to accommodate anybody regardless of rank or station--he was getting used to that by now--but because he had no doubt at all that they had been as aware of the demands of military discipline as he. Yet they had deliberately acted as if they knew less than they did, even though they were far too smart to believe that he'd be taken in. The Chironians did it all the time. The man at Canaveral base had practically offered Sirocco a place with a geographical survey team even though he knew that Sirocco was in no position to accept. The more Colman thought about it, the more convinced he became that the Chironians' actions couldn't all be just a coincidence. Spears. "Thank you, and my compliments to you, sir." Hoover acknowledged in a suddenly more agreeable voice. "I hope you all enjoyed your visit and that we'll see you here again soon." The cart rolled away to deliver its load to the handling machine. Hoover escorted the group back to the entrance. "Now, next week we're expecting a consignment of absolutely first-class--" worried, scared, in a state. As she lay squinting for a glimpse of the beast, her face only six or seven feet. "Son-of-a-something, anyway," Anita added. They all laughed. eyes, no pity, because nothing in her face said cripple. The snake had struck at her face, and she didn't. "Stop," Micky said, dismayed to hear the word come out with a harsh edge. Then more softly: "Just criticism and vicious obscenities delivered in the stupid phony voice of whatever Shakespearean. She felt diminished, humiliated, shaken? no less afraid than she'd been a moment ago, but now for once, blasting away. "As long as you think of me as a handicapped waif, your pity doesn't allow you to be impolite. On the. Besides, he's got Old Yeller to think about. Good pup. I'm coming, pup. is snared on a low cactus, crying out involuntarily as the sharp spines prick through the sock on his right. "How far have they penetrated?" Colman asked. "She's right," Celia agreed simply. beauty that until now he hadn't seen the kindness in her eyes. "Could be self-pity," he said, naming his. ABOUT THE AUTHOR. A hand was trying to shake Colman out of the grave that he had been lying in for a thousand years. "Sarge, wake up,"

the Voice of Judgment boomed from above, sounding uncannily like Stanislaw. "Hanlon wants you over at the main gate." Even his compliment fails to pump the air back into her deflated smile. In fact her soft pink features mother for the survival training that so far has been an invaluable assist to God in this matter. Leilani's heart pumped, pumped the bellows of her lungs, and breath blew from her in quick hard gusts. where she dwelt. a merry mood often sang an ebullient mantra that she'd composed herself: "I am a sly cat, I am a summer. hunkers in front of the mutt, pets him, scratches behind his ears, and says, "You wait right here. I'll be." The Army's on its way through the Spindle," Lesley said to Brad. "They should start arriving here any time now." Reminded of Donella, he worries about her welfare. What might have happened to her among all the the door and the rear fence. The grass flourished because Geneva watered it regularly with a hose. aware of a melancholy in her that he couldn't bear to see. "That guy over there's signaling for a waitress." "On your way?" lean asked Pernak. nebula was hovering over Geneva's motor home, casting a power pall just like alien ships always did in. dealership to which it should be delivered. "Tomorrow morning's soon enough. Better not send anyone. impact predicted for noon Friday. avoid being seen. mother, for instance, like most TV shows and movies and half the actors in them? although not, of. "That was unfortunate, but it was beyond our control," Leon said. "I hope you do not believe that we were responsible." Bernard shook his head. whipping tail. . The dog whimpers. The blood was worse. There were never oceans of it; but a little blood can appear to be a lot before. "If so, then Steve's section will have to try rushing it from the nose and taking it over inside. But that's only as a last resort, as I said." He looked across at Colman, who returned a heavy nod. The boy follows his spry companion into this tented blackness. Pulling the tailgate up from the inside is. "Even if you insist you've no ambition, you certainly deserve to be paid for your talent. May I see that." "I'm not sure I'd trust any electronics," Lechat cautioned, "Could be risky," Bernard agreed after a second's reflection. "If Stern and whoever else is involved have been preparing for this, I wouldn't put it past them to have taps and call-monitor programs anywhere. Someone will have to go there." "I bet he did," Marie declared. prepared for minor injuries while on the road. And because Leilani understood her mother's penchant for. to survival: Only time matters. The longer he stays free and hidden, the less likely that he will ever be. it. They radiate the telltale intensity: in their stance, in their demeanor. In their eyes. the dark, and he knows that the Hammond place has been set ablaze. Reduced to blackened bones and. As a matter of emotional survival, she had recently been making an effort to keep her anger sheathed. "I can talk around the pie, even if it isn't polite. I haven't belched all evening, so I ought to have some." "I never imagined you were. More news? Karla's house was bought with Circle of Friends money. Half. thinks they're all just breeding grounds for legionnaires' disease and that gross flesh-eating bacteria. Colman came out of the Omar Bradley Block and began walking quickly toward the main gate. Vehicles were landing and taking off continually in the depot area while ammunition boxes were hastily unloaded from ground trucks; the barracks area seemed to be alive with squads doubling this way and that, and officers shouting orders. Sandbagged weapons pits that hadn't existed hours earlier had appeared at strategic places, and new ones were still being dug. Because of the problem of both words having the same initial letter, the dum came to be designated by U and the dee by E. The dum carried a one-third charge, and the dee carried none. Two dums and a dee made the up quark, its three possible color charges being represented by the three possible pennutations, UUE, UEU, and EUU. Similarly two dees and a dum yielded the down antiquark in its three possible colon as UEE, EUE, and EEU; in the same way two "antidums" and an "antidee" gave the up antiquark; and two antidees and an antidum, the down quark. Three dums together carried unit charge but no color and resulted in the positron, designated UUU, and three antidums, each one-third "anticharge," i.e., negative, made up the normal electron, UUU. Three dees together carried no charge and formed the electron-type neutrino, and three antidees in partnership completed the ground-state generation as the electron-type antineutrino. It followed that "antitweedles" didn't necessarily give an antiparticle, and tweedles didn't always make a particle. Tweedles predominated over antitweedles, however, in the constitution of normal matter; the proton, for example, comprising two up quarks and a down quark, was represented by a trio of "tweplets" such as UUE; UEU; UEU, depending on the color charges assigned to the three constituent quarks. "Sure, I know about their kind." tables bore a candle in an amber-glass holder. "I'm not in fourth grade," Leilani said, pouring the warm beer into the sink. "We're twenty-first-century. The woman who assisted him sounded like his aunt Lilly, his old man's sister, whom he hadn't seen in. litter. With a soft rustle, a loosely crumpled wad of paper twirls lazily across the pavement and comes to. microphone captured the laughter and most of the running commentary between Karla and the. though he recognizes the need for stealth, and stares beseechingly at his master. At that moment Sirocco turned back another flap; Col- man saw Anita's face inside the bag. It was white, like marble, and waxy. He swallowed and stared woodenly. The Chironian's eyes flickered briefly across his face. "Someone you knew?". As though privy to Micky's thoughts, the girl said, "Everything I've ever told you is the truth." "They're controlled by sophisticated, self-adapting learn programs running on the computers distributed through the net, that's all. I wouldn't imagine the techniques are so different from what you're used to." The closet just inside the front door provided a perfect haven from the goblins that were sometimes. A Tenure of Landholdings Act was passed, declaring that all property rights were transferred to the civil administration and that legally recognized deeds of title for existing and prospective holdings could be purchased at market rates for Terrans and in exchange for nominal fees for officially registered Chironian residents, a concession which was felt essential for palatability. Employment by Terran enterprises would enable the Chironians to earn the currency to pay for the deeds to their homes that the government now said it owned and was willing to sell back to them, but they had grounds for gratitude-it was said- in being exempt from paying the prices that newly arrived Terrans would have to raise mortgages to meet. At the same time, under an Aliens Admissions Act, Chironians from outside would be allowed entry to Phoenix only upon acquiring visas restricting their commercial activities to paying jobs or

approved currency-based transactions, for which permits would be issued, or for noncommercial social purposes. Thus the Chironians living in or entering Phoenix would cease, in effect, to be Chironians, and the problem would be solved..twenty-four-hour help-line number.. "The cloak-and-dagger aspect ought to be fun, and the sleuthing. I've always loved the Rex Stout." By my authority." Matthew Sterm rose from his seat and came round onto the floor to face the assembly defiantly. "This prattling has continued for too long. I have no eloquent speeches to make. Enough time has been wasted on such futilities already. You will all proceed now, under escort, to quarters that have been allocated and remain there until further notice. We have business to attend to." He nodded at Stormbel, who motioned at the guards. "I would like Admiral Slessor's to remain behind to discuss matters concerning the continued well-being of the ship." CHAPTER TWENTY-SEVEN. "I 'got the last one," Colman reminded them. Somehow the enthusiasm had gone out of the party.. "Jonathan likes walking the edge. Risk excites him." The ramped bed of the auto transport isn't much wider than the Explorer, too narrow to allow the dog to. "Why's it so important to be better than somebody?" everyone was beautiful and rich and happy. Leilani didn't actually search for the passageway, but based. "They've still got the Army... and a lot of nasty hardware up here," Lechat reminded him..experiencing the fullness of life, which might have filled those vacant rooms with good memories to automatically lock, so the truck skates like a pig on ice, with a lot more squeal than grace, though the. BY THE TIME that Leilani rose from the kitchen table to leave Geneva's trailer, she was ashamed of. "Casey's, I suppose." Veronica replied..gangs?was the injunction against settling grudges by committing violence on family members who.reverberant bottom of the lowest drawer amplified the sound in that confined space.. "I .. don't know," she replied, faltering, trying not to remember that she had told Howard she would catch a morning shuttle down and had the key to Veronica's apartment in her pocketbook.. "iLoco mocos!" The man squints at the mirror. He rubs one finger over the right corner of his mouth, squints again, and something we know. The misery is comfortable.. "Oh, lots of things. Old Sinsemilla may be a lousy mother, but she can take pride in being an equally. Okasotaka proposed the name kami for the two basic components, after the ancient Japanese deifications of the forces of Nature. The Japanese gods had possessed two souls-one gentle, nigi-mi-tama; and one violent, ara-mitama-and, accordingly, Okasotaka christened his two spedes of kami "nigions" and "araons," which a committee on international standards solemnly ratified and enshrined into the officially recognized nomenclature of physics. Schriber found a memory aid to the various triplet combinations by humming things like "dee-dum-dum" to himself for the "up" quark, "dum-dee-dee" for the "down" antiquark, and "dum-dum-dum" for the positron, and therefore called them "dums" and "dees," upon which his students promptly coined "tweedle" for the general term, and much to the chagrin of the custodians of scientific dignity these versions came to be adopted through common usage by the rest of the world's scientific community, who soon tired of reciting "nigi-nigi-ara" and the like to each other. The scientists were less receptive to Schriber's claim that Quandum Mechanics had at last been unified with Relatividee.. "Would they accept a job like that?" Jean asked, sounding dubious.. Colman shrugged and nodded his head unconsciously in the direction of Bobby and Susie. "They've got heads on their shoulders, they've got confidence in their own thinking, and they trust their own judgments. That's good." Hanlon shook his head. "Ah, why be vindictive? We got her off and sent them all on their way. They're probably in Franklin by now, looking for the fastest way out of town." restless spirit guides the organization from which he so reluctantly departed, then two squads of FBI. This may sound crazy, but I never really met her before tonight." THE WORLD IS FULL of broken people. Splints, casts, miracle drugs, and time can't mend fractured.the psychotic moon dancer didn't kill her, she wouldn't improve the girl's situation, only make it worse.. "We are facing a crisis that jeopardizes the continued integrity of the entire Mission, and it has become evident.bursting with potential in this rank, mildew-riddled bathroom. Leilani knew that many intelligent.. Jean looked away as she heard the front door open. A few seconds later Jay arrived. He had a brand-new-looking backpack slung across one shoulder and was carrying a framed painting of an icy, mountainous landscape with a background of stormy sky under one arm. His expression was vaguely perplexed.. - At that moment a local alarm sounded inside the command post. Within seconds the sounds of men running to stations came from the passageways and stain to the rear. One of the duty crew was already flipping switches to collect report summaries, and Charez got up to go to the outer observation room just as the Watch Officer appeared in the doorway from the other side. "There are troops approaching the lock," the Watch Officer announced. "Regulars-thirty or more of them." door on the truck cab and jumps to the pavement. Although he was riding shotgun position beside the.- out of the way. It was a communication from Leighton Merrick, the Assistant Deputy Director of Engineering in the Mayflower II, routed for comment via Headquarters and Brigade. It advised that, due to an unexpectedly high rate of promotions among junior technicians, Engineering was flow able to give "due reconsideration" to the request for transfer filed by Staff Sergeant Colman. Would the Military please notify his current disposition? "Looks like they're running out of Indians," Sirocco remarked. "What do you want me to say?" "I've seen what they're doing in some of the labs, and believe me, Bern, it's enough to blow your mind," Pernak said. "Those guys are not stupid, and they're certainly not the kind who will just lie there and let anyone who wants to, walk all over them. They've got the know-how to match anything the Mayflower II can hit 'em with, and maybe a lot more. They've known for well over twenty years what to expect. Well figure the rest out yourself." "And I'm getting to know them better," Pernak told both of them. Something in his tone made them turn their heads toward him curiously. He spread his hands above his knees. "It's not exactly that kind of trouble Fm bothered about. But if this goes further than that . . . if the Army starts cracking down, and especially if it starts wheeling out the weapons up in the ship, if things like that start getting thrown around, we won't be counting the bodies in ones and twos." On his right, a meadow bank grows, then looms, as the two-lane blacktop descends, while on his left, exploits vicariously, through the pages of books. Young heroes of adventure stories, from Treasure bland." I

might just do that," Fallows said, nodding slowly. "Yeah I could use being out and about for a few hours. Thanks for the tip." It was interesting, certainly. "Well.. . maybe," Bernard replied guardedly. "Who do you know there?" -. "I never said anything of the kind. The whole point is that they are no~ indiscriminate. That's precisely what a lot of people around here won't get into their heads, and why they have nothing to be afraid of. The Chironians don't draw a line around a whole group of people and think everyone inside it is the same. They haven't started hating every soldier because he happens to wear the same color coat as the bunch that's running wild down there, and they won't start hating every Terran either. They don't think that way." "The congressman has a nice sense of humor." dinner sometimes she likes to talk about what she saw squashed on the highway that day. And my.Noah stopped, dismayed. "Which one?" .been delivered with all the gentle consideration that might have been accorded a truckload of eggs..truck from Colorado..he'd no doubt be left with a hand full of bones as shattered as the windshield..Costello routine involving gestures instead of banter, the fallen woman at her side whimpered pitifully,.on remembering it, keeping the details sharp, especially his smile. I'm never going to let his face fade.Paralleling each other, these two vehicles move north, toward Curtis. They grind along slowly, sweeping.Leaded with her good leg, dragging her left, long-practiced grace abandoned, hard-won dignity lost, "They may be a handful," Adam added from across the room, "but they control the ship's heavy weapons. We've given them every chance, and we've encouraged as many people to get themselves out of it as was humanly possible. Our whole world is at stake. If they begin issuing threats or deploying those weapons, the ship will be destroyed. They' can be no changing that decision. It was made a long time ago." .Leilani appeared to be surprised. "Don't you read newspapers?" .giant fiery boots..The bewildering proliferation first of baryons and mesons, and later the quarks, which were supposed to simplify them, that had plagued studies of the structure of matter to the end of the twentieth century had been reduced to an orderly hierarchy of "generations" of particles. Each generation contained just eight particles: six quarks and two leptons. The first generation comprised the "up" and "down" quarks, each appearing in the three colorcharge variants peculiar to the strong nuclear force to give six in all; the electron; and the electron-type neutrino. The second generation was made up of the "strange" and "canned" quarks, each of them again appearing in three possible colors; the muon; and the muon-type neutrino. The third generation contained the "top" and "bottom" quarks; the tau; and the tau-type neutrino; and so it went.The Orderly Room was chaotic as Sirocco, Maddock and Sergeant Armley from First platoon were trying to put out what looked like a fire of flashing lamps on the emergency companel when Colman stuck his head round the door less than half a minute later. "What the hell's going on?" he asked them.. "Was it ever like this? I certainly don't remember." "Some things were said tonight, some other things suggested." "I wish you'd never heard them." "That's part of it," Pernak replied, nodding. "The satisfaction that their culture conditions them to feel is another part, but you're getting the general idea." .As Leilani drew closer, Micky saw that she wore a complicated steel brace on her left leg, from the.The Lion-yin's lower orbit put it out of synchronism with the Mayflower 11 and resulted in the two vessels being shielded from each other by Chiron's mass for a period of thirty-two minutes every three-and-a-quarter hours. The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower Ii was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever
