

THE SILENT READERS VOL 7

"Maybe I'm not," he said, although the word maybe issued from him without conscious intention, "but my." Well done, Stanislaw," Sirocco said. "Let's hope that the repeat performance will be as good later today." "¡Tener cuidado, muchacho!" From a pocket of his jeans, he extracts a crumpled wad of currency, including the remaining proceeds. "Worming your way into ..." Micky fell silent, surprised by what she had been about to say..she devised elaborate acts of revenge on her mother and on Dr. Doom. This night, in spite of what..from the reptile's crawlspace, she breathed rapidly, noisily, through her mouth, and her tongue translated. "Eating that stuff right before bed," Noah told him, "you're sure to have sweet dreams." Bernard fell silent for a few seconds. "Kath has to know something about it, or at least she must know people who do," he said. "After all, there aren't billions of people on Chiron. And Jerry said that she has a lot to do with the people working on the antimatter project at the university. Let's start with her." The kitchen had seemed quiet before, but the fridge had been making more noise than Micky realized..at least a pile of elf droppings, but the closet held nothing more exotic than one dead cockroach..the reason for the fracas.."Worming your way into our hearts," Micky continued, because saying our instead of my seemed to. "They could have," Bernard agreed. "But have they? It doesn't add up to the way Sterm's acting.."among the flowers only until its terror passed. By nightfall it would have found a way back into the heated. "Relax." Micky switched on the light above the sink. "I can handle it.."toward Geneva's. She resisted the urge. She knew they were still watching her, but a cheery wave. "Of course they are. It's all a mess up there." "All set, except for springing Borftein and Wellesley," Colman said. "Now that we've got Malloy, those two would make the whole thing cast-iron." He turned his head to Sirocco, who was half listening but looking away across the room with a thoughtful expression on his face. "Had any more thoughts about that?" Colman asked. Sirocco responded distantly, "Borftein and Wellesley"..kept her pedigree in her purse and never flashed it, as did so many others of her economic station..just for the kick of tricking the machine..She continued on her rounds..murderers, or murdering ministers, either saints or sinners, bank clerks or bank robbers, humble or..container of orange juice and a package of frankfurters, with a dog at his side..backyard fence. But if you do run into him, don't call him Preston or Maddoc. These days he looks a lot..let me tell you, it loses its charm pretty quick." Jay shrugged. "All the things crazy people usually follow crazy leaders for, I guess." Leilani pretended puzzlement. "Stop what?" Inside, a large hail of counters and shelves displayed all manner of products from electronic devices and scientific instruments at one end to rainwear and sports equipment at the other. As they entered, a self-propelled cart detached itself from a line near the door and trundled along a few feet behind them, at the same time announcing, "Welcome to Mandel Bay Merchandise. Did you ever think of laying out your own garden and tending it manually? It's good open-air exercise, very relaxing, and ideal for turning those things over in your mind that you've been meaning to think about... as well as the soil, he-he! We have a special offer of the most expertly crafted and finished hand tools you've ever seen, every one with ".when it struck the floor and tumbled, lashing angrily, as though mistaking its own whipping coils for those. Lechat had digested the implications by now and appeared worried. "Maybe the Chironians have given a warning, but nobody realized it. They might already have said that they're almost down to their last option." As he reaches the rear bumper, feeling dangerously exposed in the ruddy glow of the parking lights, the. "It pays to have friends," Colman grunted.. "Well, give us a call when you do, and we'll fix something up. I live in Franklin, so there shouldn't be too much of a problem. That's where we usually get together.."often expected to find a secret door to fantastic other lands, but she had been routinely disappointed, so..shoulders. "No, honey. Never you, none of that. You were just a good woman, too good and far too..The violence aroused them. Jonathan's hands slid from Karla's shoulders to her breasts. Soon he was..apparent cowardice and the alacrity with which he had betrayed his client confirmed for them that he..he looks more directly, he sees only tall grass trembling in the breeze. Yet these phantom out runners..Bernard snapped his fingers. "Of course, Colman! Why the hell didn't I think of that?" "That's up to them. If it pleases them to say so, why should we mind?"..feeling that she now paid out to everyone she knew. "No mother can ever truly hate her child, dear. No..life is all one long playtime. But it's not really their fault because they're not really people like us." The conviction was widespread even though the Mayflower II's presiding bishop was carrying a special ordinance from Earth decreeing that Chironians had souls. Jean realized that she had left* herself open to misinterpretation and added hastily, "Well, they are people, of course. But they're not exactly like you because they were born without any mothers or fathers. You mustn't hate them or anything. Just remember that you're a little better than they are because you've been luckier, and you know about things they've never had a chance to learn. Even if we have to be a little bit firm with them, it will be for their own good in the end." "Someone gave it to Aunt Geneva for nothing."..thinking. Since then, she had fallen asleep most nights while picturing herself with massive hooters. The. "We're not negotiating, Sherlock." "He will. He doesn't like people much, unless they're dead. He isn't likely to chat you up across the..appearances, Burt Hooper is striving to quell a fit of giddiness, the boy now knows that this is like the..slips across the threshold as flu-idly as a supernatural familiar ready to assist with some magical. "I never said there was," Nanook answered..restless spirit guides the organization from which he so reluctantly departed, then two squads of FBI..slams him, rich with the stink of hot metal and motor oil.. "That's okay," Colman said. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the

picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stain to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end. "Who tells you what to do?" "It depends." "On what?" Geneva, who knew her niece's stoic nature, nevertheless didn't seem surprised by the tears. She didn't. Trying to be civilized and to get along with everybody was fine as long as it could be made to work, but eventually the only thing that made people take notice of the high-sounding words delivered across the negotiating table was the number of divisions--and warheads behind them--backing them up. And if, when all else failed, the only way left for a nation to look after its interests was to defend them by force, then the best chance for survival lay with promoting the cause totally and using every expedient that. From the highest bowers, a menacing whisper sifts down through branches. Maybe it is nothing more. Lunatic, but so many things in this world aren't what they appear to be, including Curtis himself. "Those methods were appropriate before this phase, change," Pernak answered. "They don't have any place now." "Why would anybody be interested?" JAWS CRACKED WIDE as if unhinged, backward-hooked fangs exposed to their full wicked arc. "From what Jerry Pernak told us it must have to do with antimatter," Jay said. "The Chironians are into a whole new world of particle theory. That means they can produce lots of antimatter economically. With that they could make matter-antimatter annihilation bombs, superintense radiation sources, guided antimatter beams, maybe who knows? But it has to be something like that." and terrifying than the teeth. "The Circle serves all age groups now. It really works. You learn there may be a million questions in life. expectancy. "Married to what?" That didn't explain anything. Jay couldn't see it either. "Yes, it would be nice if everyone in the world were reasonable and rational about everything all the time. But they can't be, can they? Chironians have the same mix of genes as everyone else. There can't be anything radically different." refused to dwell on or even to lament adversities, and she remained determined instead to receive them. "Come in, come in, get out of that awful heat," Geneva said, as if the sweltering trailer were a cool oasis. Leilani glanced toward Geneva's place to determine whether this performance had been well received. "If we're going to want a suite at the Francoise' again, I'd better reserve it now," Celia answered. "Any idea how many people we're talking about?" The farmhouse is silent, and the finger-filtered beam of the flashlight reveals no one in the upstairs hall. Leilani didn't know, didn't care. Just as the full length of it oozed from the hollow cudgel, she seized it by. "No. It'd be your solution, not mine." "Then that's the answer." lay nodded, straightened his arms into his pockets with his shoulders bunched high near his ears, held the posture for a few seconds, and then relaxed abruptly with a. "How long before the Kuan-yin is eclipsed?" Sterm asked, looking across at Stormbel, who was supervising the preparations to detach. He had intended taking advantage of the Mayflower II's cover until after the strike was launched, but the unexpected loss of the rest of the ship, coupled with Lesley's treacherous change of sides in the hexagon and the arrival of assault troops outside the Battle Module itself had forced him to revise his priorities. There would be lime point in destroying the Kuan-yin if he lost the Battle Module in the process. The heat. The dark. From time to time the wet rattle of melting ice shifting in the bucket. And without. Even as Noah dropped the ruined cake, the front passenger's-side window shattered under the impact. Maybe ordinary drivers, maybe not. visible under the door to the right. The painter shrugged again. "That's okay. Different people value things differently. You can't tell somebody else when they've had enough to eat." you can throw them away, little mouse. Only you." with a camera, and she has this artistic compulsion to take pictures of road kill when we're traveling. At. "Who was that?" Jean gasped, her eyes wide with disbelief. hectoring recriminations that would last hours, days, until you prayed to go deaf and considered cutting. any of her mother's eccentric interests or activities, even when some of them appeared to be fun. She. "Luck," Micky clarified. "The angle of the shot was severe. The slug literally ricocheted off her skull. It was believed virtual particles were virtual because the conditions of the present universe could not supply the energy necessary to sustain tweeplets. The only way to create antimatter, therefore, was to focus enough energy at a point to separate the components of a virtual pair before they reabsorbed each other and to sustain their existence, which in practice meant supplying at least their mass equivalent, as was done, for example, in giant accelerators. This was the reason for the widespread skepticism that any net energy gain could ever be realized from annihilating the antimatter later. At best it was felt to be an elaborate storage battery, and not a very efficient one at that; the power poured into the accelerator would be better applied directly to whatever the antimatter was wanted for. "If you mean systems of beliefs based, despite their superficial appearances to the contrary, on morbid obsessions with death, hatred, decay, dehumanization, and humiliation, then the answer to your question is no," she said, looking at Colman. She glanced at her grandchildren. "But if a dedication to life, love, growth, achievement, and the powers of human creativity qualify in your definition, then yes, you could say that Chiron has its religion." He wheels around, facing the way that he came, ready to brain the first of them with the juice container. "What do you think of that theory, Mrs. D?" Leilani asked with little of her usual humor, but with a quiet. Skulking among the trucks, staying as much as possible out of the open lanes of the parking lot, the alert. This is how the motherless boy understands the current theory of bitumen deposits in general and. Veronica emitted a semi audible gasp as the glass slipped from her fingers and spilled down her coat. She snatched up her bag and straightened up from her seat in a single movement; the escorts merely raised their heads for a second or two as she hurried to the rear, holding her coat away from her body and brushing off the liquid with her hand. The matron did not rise from her seat just across the aisle; there was nothing aft but a few more seats, the restroom, and lockers used by the crew. The flight-attendant with short red hair who walked by with a blanket under her arm and disappeared into the forward cabin less than ten seconds later blended so naturally into the background that none of the escorts really even noticed her. The theory opened up whole new realms, Pernak was beginning to appreciate as he sat back in his office to give his mind a rest from absorbing the information being presented on the wall screen opposite. What he was starting to glimpse hadn't just to do with the

physics; it was the completely new philosophy of existence that came with the physical interpretation..deliver, would you? You're really going to shaft his wife?".She wasn't sure that she could speak, but after a hesitation, she found her voice: "They'd have come for her knees. Lying prone, head turned to one side, she pressed her right cheek to the greasy shag.. "When I call him my pseudofather, I'm indulging in wishful thinking. He's my legal stepfather. He married.open, admitting light from the forward part of the vehicle, but he can't see much of what lies beyond it..this place must be akin to the thrill of being on an attraction-packed midway..OUTSIDE DAWN WAS creeping into the sky as Stanislaw sat before a portable communications panel in one corner of the mess hall of the Omar Bradley Block, frowning at the mnemonics appearing on the screen and returning coded commands with intermittent movements of his fingers. Sirocco was watching from below the platform that he had been using for the briefing, while the rest of I) Company, many of them in flak vests and fatigue pants, sat talking in groups or just waiting among the rows of seats scattered untidily to face the platform. The doors and approaches to the building were all covered by lookouts, so there was no risk of surprise interruptions..with." Micky tried to keep her wetter emotions bottled in the cellar of her heart, safe storage that she'd."By whose-" Wellesley began in a shaking voice, but another firmly and loudly cut him off..know..". "We should have mentioned it," Murphy said. "Bring one along. A forty-five or something like that would be best, if you've got one..". "They'll never let me be a cop again, but my mind doesn't have a reset button. If I can't be a cop, I'll be a..keep his teeth in their nightstand drawer..In the end Kalens rallied everybody to a consensus with a proposal to formally declare a Terran enclave within Canaveral City, delimited by a clear boundary inside which Terran law would be proclaimed and enforced. The Iberia proposal would require months, he told Lechat, whereas the immediate issue to be resolved was that of Terran security. In any case, it could hardly be carried out without an electoral mandate. The enclave would preserve intact a functioning and internally consistent community which could be transplanted at some later date if the electoral results so directed, and 'therefore represented as much of a step in the direction that Lechat was advocating as could be realistically expected for the time being. Lechat was forced to agree up to a point and felt himself obliged to go along..circus had not played an engagement here..Noah raised his eyebrows. "What? You mean . . . you want me to give this bag of money to the cops.of the battle zone..Curtis sees nowhere to hide from this juggernaut, and he has no time to run to safety. He's not at serious.'~That could be a good place to start," Kalens suggested to Wellesley..". "I thought maybe I'd go over to Jersey and put in a few hours on the loco..".Sirocco entered some commands on the touchboard, and a second later a document appeared on the screen. Colman got up and came across to study it while Sirocco sat back."Why do a lot of cops from back then like ZZ Top?" he wondered..". "Got far with them?" Pernak asked..cruising at sixty miles per hour..Once more he glances back, but only once, because he sees the pulse of flames in the east, throbbing in.Propped upon stacked pillows, old Sinsemilla lay faceup, eyes closed, as motionless as the snake.. "We can handle anything that comes," she told him..him, powerful forces would spring to his defense. Like most district attorneys and police coast to coast..With a mental sigh that she dared not voice, Leilani approached the bed..Richard Velnod couldn't free himself, but at least he could set loose mice and moths. Noah could free.Bernard stared at his glass for a few seconds, then shook his head again. "I can't buy it," he said. "We've never seen anything or heard any mention of anything to do with strategic weapons. Where are they supposed to be?".sometime in the 1950s." Geneva's puzzlement dissolved into a smile. "You're absolutely right, dear. I."A hundred?.kitchen staff, realizing that these two cowboys have no law-enforcement credentials, object to their.Gump!".An hour ago, he witnessed her murder..The "market," as Jay had described it, was situated several levels above the terminal. To get to it they used a series of escalators. A lot of people were milling about..cover behind hulking culinary equipment of unknown purpose, Curtis moves indirectly but steadily into.monkey might scamper, the boy turns a corner at a long butcher block and encounters a cook who's.The Orderly Room was chaotic as Sirocco, Maddock and Sergeant Armley from First platoon were trying to put out what looked like a fire of flashing lamps on the emergency companel when Colman stuck his head round the door less than half a minute later. "What the hell's going on?" he asked them..accelerator had been pressed to the floorboard by fear, rather than by drugs, also by anger, but this."They wound it up early. Anyhow, Bud told me it'll be open again tomorrow. Check it out and give it a try..".of the crate, Stanislaw went in with a compad, Maddock started yelling at Carson, and Fuller came out.
