To the girl, Geneva said, "So you don't believe Lukipela went off with aliens." Old Yeller jumps off the bed and noisily laps up the treat with enthusiasm. She doesn't hesitate or pause. "We feel we owe something, and we want to pay our way," Driscoll confirmed. "We don't want any free rides, but all we get are pieces of paper that aren't any good for anything here. What can you do?" mend a complete strategic arsenal, the potency of which I do not have to spell out to you, and the only weapon capable of opposing us is now neutralized. Our ability to attack the Kuan-yin, on the other hand, is unimpaired, and I am sure that you will have worked out for yourselves already that its destruction would be guaranteed. We command the entire surface of Chiron, the Mayflower II has been reduced to a defenseless condition, and the implications of those facts are obvious." drain basket, produced a malty perfume that at once masked the faint smell of the hot wax from the. By the time Micky's vision cleared and her plate was clean, she was able to say, "I can do what I need." "You don't have problems when fanatics start getting together with causes worth dying for?" "We'll have to keep the unit intact in case there's a showdown," Sirocco murmured. "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and wet just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and tuned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?" And perhaps his mother's spirit watches over him.. evening. She must have left before it happened." Beside Sirocco, Colman breathed an audible sigh of relief.. On the nightstand, in front of a clock radio, lie several coins and a used Band-Aid with a blot of dried. Colman looked away in a daze. Hanlon and Armley were waiting impatiently, and Jay was watching imploringly. He thought furiously. Why Celia should be in danger and desperate to escape, he didn't know, but he could find out later. If he said he had to get away for a few hours. Sirocco would cover for him, so that was okay. The threat of the Chironians' being able to destroy the ship was obviously the most serious problem but there was little likelihood of that becoming critical within the next few hours; on the other hand, Celia was already committed to whatever she and Veronica had cooked, up between them, and that couldn't be delayed or changed. So Celia would have to come first. Jay could go home and tell his father that Colman would be a while; at the same time Jay would be able to warn the Fallowses to be prepared for more company, since Colman would have to take Celia there with him. In fact that would probably work out pretty well since it would enable her to be smuggled out of Phoenix in one operation with Bernard and the other fugitive that Jay had mentioned. Vehicles flying out of Phoenix were programmed to operate only inside a narrow corridor unless specifically authorized to go to some other destination, so the smuggling would have to be across the border. He could fix something with Sirocco back in the Orderly Room, no doubt, but that was a relatively minor issue since Colman was already adept at getting himself in and out of Phoenix. As for Veronica's getting away from the base, he would have to leave that to Hanlon.. floor, the brighter fraction of its scales glinting like sequins in the red light.. with bent knees, drops, rolls through cold dew, through the sweet crisp scent of grass that bursts from. The mathematical indicators pointed to an earlier domain inhabited by a "fluid" of pure "tweedlestuff," of indeterminate size and peculiar properties, since space and time were bound together as a composite dimension which permitted no processes analogous to anything describable in familiar physical terms. There were grounds for supposing that if an expanding nodule of disentangled space and time were introduced arbitrarily through some mechanism'- pictured by some people as a bubble appearing in soda water, although this wasn't really accurate.-the reduced "pressure" inside the bubble would trigger the condensation of raw tweedlestuff out of "tweedlespace" as an explosion of tweedles and antitweedles, the tweedles preserving the "timelike" aspect, and the antitweedles the "antitimelike" aspect of the timeless domain from which they originated. Their mutual affinity would precipitate their combination into a dense photon fluid in which timelessness became reestablished, which tied in with Relativity by explaining why time stood

still, for moving photons and accounting for the strange connection in the perceived universe between the rate at which time flowed and the speed of light. The high-energy conditions of the Primordial photon fluid, the density of which would have approximated that of the atomic nucleus, would favor the formation of "tweeplet" entities to give rise to matter interacting under conditions dominated by the strong nuclear force, which manifested itself to restore nonAbelian gauge symmetry with respect to the variance introduced by the separation of space and time. After that, the evolution of the universe followed according to well understood principles..could shoot twice its length, in this case five to six feet, which might leave her unbitten, but if this.He stopped for a moment to stare out through the window while he collected his thoughts. Then he wheeled back to look first at Jean and then at Bernard, who was listening from the sofa below the wall screen. "Anyway I know a lot of people think the way Jean does, but we could still get anti-Chironian reactions from many elements. That's what worries me. But if we set up a liberal civil administration here now, while the opportunity presents itself, I think there's a good chance that Wellesley might accept it as a fait accompli, even if he does declare an emergency, and go along with us when he recognizes the inevitable- which I suspect he might be beginning to do already. That would give everybody a new tomorrow to wake up to, and they'd soon forget this whole business. But there isn't much time. That's why I skipped the meeting. Now you two can help, pretty much in the ways we've discussed. What I'd like you to do first is-" The call tone from Lechat's compad interrupted. He looked down Instinctively at the breast pocket of his jacket. "Excuse me for a moment." Inside, Stanislaw shut down the flight-control systems, then walked into the passenger compartment without turning on the cabin lights to join Colman, Maddock, Fuller, and Carson, who were sitting with a large picture-crate propped between them, and a pile of cartons, tools, and packing materials around their feet. Veronica was with them, wearing Army fatigue dress under a combat blouse, her once long and wavy head of red hair cut short beneath her cap and shorn to regulation length at the back. Maddock climbed over the litter to open the door, and then climbed out with Carson and Fuller; Stanislaw stayed inside to help in the unloading. Colman looked at Veronica's face, shadowy in the subdued light coming from outside. "Feel okay?" he asked..four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth-the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..still attract men if you've got great boobs. That's been my observation, anyway. Men can be lovely." "Your bones get soft." ..was." ..Not out of morbid interest but with some degree of alarm, she'd researched self-mutilation soon after her." So what is it they've got?" Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. And they're so uninhibited' Celia just gaped at her. Veronica winked and nodded. "Really. I'll tell you about it later, I'd better go."..Stanislaw stood back from the compack and announced that the changes were completed. Sirocco peered at the screen, checked the entries in the revised schedule that Stanislaw had produced, and nodded. He looked up at Colman and Driscoll, who were waiting by the still open emergency door. "Okay, the last ball's rolling," he told them. "On your way. Good luck." They've been out there the longest." "You don't sound like a guy who wants to be friends." "Where to?" Colman asked her. The features behind the other's visor remained unsmiling. "Mister Fallows to you, Sergeant." The voice was icy. "I'm sorry, but I have work to do. I presume you have as, well. Might I suggest that we both get on with it." With that he clasped the handrails of the ladder, stepped backward off the platform to slide gently down to the level below, and turned away to rejoin the others. "Why is it the way it is? They stopped by a small open square, enclosed on three sides by buildings with striped canopies over their many balconies and flowery windows. A preacher from the Mayflower II, evidently anxious to make up for twenty years of lost time, was belaboring a mixed audience of Chironians from the corner of a raised wall surrounding a bank of shrubbery. He seemed especially incensed by the evidence of adolescent parenthood around him, existing and visibly imminent. The Chironians appeared curious but skeptical. Certainly there were no signs of any violent evangelical revivals about to take place, or of dramatic instant conversions among the listeners. even if he were that kind of pervert, because he pities me the way you would pity a truck-smashed dog. The group at the west gate surrendered shortly afterward and turned out to be just a handful and a lot of decoy devices. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. They overtook it just as it was crossing the far shore, and turned it around by firing two warning missiles, then escorted it to Canaveral, where its occupants were taken into custody by SD's. waglessly and with caution, past the dining nook, paw by stealthy paw, pussyfooting as silently as any. But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning 'too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Bernard sat forward, his expression suddenly serious. "No, I didn't," he said. "Is that what they've been doing to it? How did. His voice trailed away silently. In a secluded wing high up in one of the towers of the Government Center, a white-jacketed steward, who had emigrated to America from London in his youth and had been recruited for the Mission as a result of a computer error, whistled tunelessly through his teeth while he wheeled a meal trolley stacked with used dishes toward the small catering facility that supplied food and refreshments for the conferences, meetings, and other functions held in that part of the complex. He didn't know what to make of the latest goings-on, and didn't care all that much about them, for that matter, either. It was all the same to him. Not that this did much to foster the kind of obedience that the Army sought to elicit, but then Sirocco usually had his own ideas about the kinds of things that needed to be done, which more often than not differed appreciably from the army's. Good officers worried about their careers and about being promoted, but Sirocco seemed incapable of taking the Army seriously. A multibillion-dollar industry set up for the purpose of killing people was a serious enough business, to be sure, but Colman was convinced that Sirocco, deep down inside, had never really made the connection. It was a game that he enjoyed playing. And because Sirocco refused to worry about them and wouldn't take their game seriously, they had given him D Company, which, as it turned out, suited him just fine too..
